<tbody>
<tr>
<td>“Course Improvement Strategies”</td>
<td>10:30 - 12:00, FEC 308</td>
</tr>
</tbody>
</table>

Civics and Homeland Security in a Chemical Process Safety Course ..................................................2.1
David L. Silverstein; University of Kentucky

Incorporating Projects and Problems in a Thermodynamics Course to Improve Critical Thinking / Real-World Problem Solving ........................................................................................................................................2.2
Donald P. Visco, Jr.; Tennessee Technological University

Group Homeworks: A Mutually Beneficial Cooperative Learning Strategy ...............................................2.3
Adrienne R. Minerick; Mississippi State University

ABET Binders Simpler and More Efficient Approach to Map Program Outcomes and Educational Objective ......................................................................................................................2.4
Mario Oyanader; Venkat Subramanian, Joseph Biernacki and Pedro Arce; Tennessee Technological University

Using E-Homework to Provide Disaggregate Problem Solving Assessment in a Senior-Level Traffic Engineering Course ...............................................................................................................................................2.5
Steven M. Click; Tennessee Technological University

<table>
<thead>
<tr>
<th>T1-B: Computer Engineering</th>
<th>Moderator: Satinderpaull Singh Devgan</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>10:30 - 12:00, FEC 215</td>
</tr>
</tbody>
</table>

A Hands-on Approach to Computer Security Instruction ........................................................................2.6
Rayford B. Vaughn Jr. and David A. Dampier; Mississippi State University

A Laboratory Framework for the Synthesis and Analysis of DSP Hardware Systems ................................2.7
Tyson S. Hall; Southern Adventist University

Construction of Parallel Machines for Engineering Courses with Retired Personal Computers ........................................................................................................................................2.8
Yili Tseng and Claude M. Hargrove; North Carolina A & T State University

Seminar-Based Electromagnetics Education ..............................................................................................2.9
Zhaoxian Zhou; University of Southern Mississippi
T1-C: Civil Engineering 1
Student Engagement: P - 16
Moderator: Scott Yost
10:30 - 12:00, FEC 219

A Field Investigation of a Large Collapsed Structure: A Student Engagement Project .................................................................2.10
Shane M. Palmquist and Ronald E. Gallagher; Western Kentucky University

Model Bridge Building Competition: An Outreach Project to get High School Students Involved in Engineering .................................................................2.11
Atin Sinha; Albany State University

K-12 Exposure to Water Quality, Treatment, Resources and Management at the Florida Aquarium as an Outreach Activity During a Large Professional Conference .................................................................2.12
K. D. Thomas, S. W. Thomas, E. Fernandez, J. A. Howard, E. Omisca, A. Gerken, L. Tyler, S. Carpenter-van Dijk, and M. A. Trotz; University of South Florida/Florida Aquarium/ASCE

Fostering Critical Thinking Skills in an Environmental Engineering Water and Wastewater Treatment Class Through A Hands-On Semester Project .................................................................2.13
Lenly J. Weathers; Tennessee Technological University

Mississippi Summer Transportation Institute 2007 .....................................................................................................................2.14
Donna S. Reese, Emma E. Seiler and Dennis D. Truax; Mississippi State University

T1-D: Administrative Division 1
Integration and Interdisciplinary Activities
Moderator: Jeffrey Fergus
10:30 - 12:00, FEC 123

Development of ‘Material Selection’ curriculum in an Integrated Science and Technology Program ...........................................................................................................2.15
Abdelrahman Rabie; James Madison University

An Example of Vertical Integration in an Engineering Curriculum .........................................................................................................................2.16
Evelyn Brown, Rick Williams, and Purvis Bedenbaugh; East Carolina University

The KNEED Program: A Novel Model for Small High-Tech Business and University Cooperation ...........................................................................................................2.17
David M. Feinauer, Donna Hewett and Bruce L. Walcott; University of Kentucky

Teaching Engineering and Science Students Computer-based Measurement Systems using Real-World Applications ...........................................................................................................2.18
Masoud Naghedolfeizi, Ugur Tanriver and Sanjeev Arora; Fort Valley State University
### T2-A: Engineering Technology 1  
**Moderator: Sherief Sheta**  
**Student Engagement**  
1:45 – 3:30, FEC 308

**Beyond the Barriers: The Incorporation of Service Learning in Technology Programs**  
Jessica L. Buck and Elizabeth McInnis; Jackson State University/Mississippi State University

**Academic Support Services and Student Engagement: Strategies to Improve Student Retention and to Promote Student Professional Development**  
E. Bernard White; George Mason University

**Using Student Engagement Projects in an Engineering Technology Program to Stimulate Regional Economic Development**  
Robert Anderson, Phillip Sanger and Michael Smith; Western Carolina University

**Innovative Teaching Methods in Information Technology Classrooms**  
Angela Lemons; North Carolina A & T State University

**Remote Labs for Online Courses with Hands-On Work**  
Andy Ju An Wang; Southern Polytechnic State

### T2-B: Instructional Division 1  
**Moderator: Adrienne Minerick**  
**Technology In and Out of the Classroom**  
1:45 – 3:30, FEC 215

**Instructional Technology Tools: Exploring What’s New**  
Mohammad Obadat and Steve Holt; University of Tennessee – Martin

**A Method to Improve Course Instruction by Utilizing Teleconferencing Techniques**  
Claude Hargrove, Walter Gilmore, and Fereshteh Fatehi; North Carolina A&T State University

**Hands-on Learning with Computer Simulation Modules for Dynamic Systems**  
Hodge Jenkins; Mercer University

**Cell Phones as Tools For Learning, Information, and Security on Our Campuses**  
Donald U. Ekong; Mercer University

**Integration of Distance Learning Technology into Traditional Engineering Physical Laboratory Exercises**  
D. Schaefer, D. Scott, G. Molina, Y. Al- Kalaani, T. Murphy, W. Johnson, and P. Thamburaj Goeser; Georgia Institute of Technology/Georgia Southern University/Armstrong Atlantic State University
**T2-C: Administrative Division 2**

**Issues Concerning Underrepresented Groups**

Moderator: Ken Brannan

1:45 – 3:30, FEC 219

*Surviving Engineering: From a Minority Female Perspective* ..........................................................2.29
Jacquelyn R. Mobley; Ecology & Environment, Inc.

*Building Bridges: Providing Special Programs for Minority Retention?* ..........................2.30
Shirley Scott-Harris and Jeffrey W. Fergus; Auburn University

*INSPIRE: A Low-Cost, Urban Pre-College Engineering Program* ............................................2.31
Brenda G. Hart, Veronica Hinton-Hudson, and James E. Lewis; University of Louisville

*Involvement of Women Engineers at Mercer University* ...........................................................2.32
Monika Bubacz, Joan M. Burtner, Laura Lackey and Laura E. Moody; Mercer University

*A Successful “Women in Engineering Camp” for High School Students* .................................2.33
Thomas B. Brackman and C. Dale Elifrits; Northern Kentucky University

*Applying the Key Findings of the EWEP Needs Assessment Final Report to a Single-Gender Outreach Program* .................................................................2.34
Robert Hewitt and Thomas Banning; University of Memphis

---

**T2-D: Administrative Division 3**

**Assessment and Analysis**

Moderator: John Brocato

1:45 – 3:30, FEC 123

*A National Jobs Information Database: Implications for Outcomes Assessment* .............2.35
Robert A. Chin; East Carolina University

*Enhanced Project-based Learning Using Peer-Feedback* ..........................................................2.36
Adrian Ieta and Y. Charles Lu; Murray State University/University of Kentucky

*Automation of Outcomes Based Assessment* .............................................................................2.37
Samir Khoury, Andrew Jackson, Merwan Mehta, and Leslie Pagliari; East Carolina University

*A Comparison of Information Literacy of Freshmen and Seniors at VMI and UTC* ..........2.38
Claire McCullough and Peter Hoadley; University of Tennessee at Chattanooga/Virginia Military Institute

*Evaluation of Viability of Alternative Energy Educational Programs in the United States* .................................................................2.39
Melissa Bliss and Robert Engelken; Arkansas State University

*The Hidden Costs and Benefits of Part Time PhD Degrees* ....................................................2.40
Timothy Pratt; Virginia Tech
Emphasizing Sustainability Principles in Developing Building Technology Courses: Engineering Educational and Research Collaboration Between Egypt and USA .................................2.41
Sherief A. Sheta and Robert A. Chin; Mansoura University/East Carolina University

A Low Cost Environmental Test Chamber for Teaching Engineering and Technology Students .................................................................................................................2.42
Aaron K. Ball, Chip Ferguson, and Frank Miceli; Western Carolina University/Asheville Buncombe Technical Community College

A Multisite Case Study of Faculty and Teacher Perceptions of NCETE Professional Development Workshops on Engineering Design Content..................................................2.43
Paul A. Asunda; Tennessee Technological University

Identification of Quality Indicators of Visual-Based Learning Material in Technology Education Programs for Grades 7-12. ...............................................................2.44
Petros J Katsioloudis; Berea College

Engineering Technology Explained in Math and Science --- A New Course ..................2.45
Zhaoxian Zhou; University of Southern Mississippi

Interdisciplinary Research for Engineering Skills Development ..............................2.46
Angel E. González-Lizardo, Polytechnic University of Puerto Rico

Industrial Research and the Academic Connection at a Regional University ..........2.47
Andrew C. Kellie and Daniel Claiborne; Murray State University

Undergraduate Research Initiative .............................................................................2.48
Roobik Gharabagi and Kyle Mitchell; Saint Louis University

An REU Experience on the Industrial Applications of Sensing, Modeling, and Control..................................................................................................................2.49
Mohamed Abdelrahman and Sally Pardue; Tennessee Technological University

Fostering Undergraduate Engineering Research in a Public University ..................2.50
S. Midturi; University of Arkansas at Little Rock
T3-C:  Civil Engineering 2  Moderator: Michael Casey  
3:45 – 5:30, FEC 219

Statistical Analysis of Law Enforcement Surveillance Impact on Sample Construction Zones in Mississippi (Part 1: Descriptive)  
Tulio Sulbaran and David Marchman; University of Southern Mississippi  
2.51

Development and Implementation of an Industry Accelerated Construction Management Capstone Course  
David L. Batie and Danny Morton, East Carolina University  
2.52

Creating Animated Multimedia Problem Solutions  
Michael H. Woo; The Citadel  
2.53

Statistical Analysis of Law Enforcement Surveillance Impact on Sample Construction Zones in Mississippi (Part 2: Inferential)  
Tulio Sulbaran and David Marchman; University of Southern Mississippi  
2.54

Impact of Metal Hangers on Landfills: Case Study  
Carlos A. Ortiz and Catherine Armstrong; Southern Polytechnic State University/ Georgia Department of Transportation  
2.55

T3-D: Administrative Division 4  Moderator: Priya Goeser  
3:45 – 5:30, FEC 123

Using LEGO® Robotics for K-12 Engineering Outreach  
Bill B. Elmore and Emma Seiler; Mississippi State University  
2.56

University Freshman Retention in North Carolina  
George Ford and Ron Mau; Western Carolina University  
2.57

A Faculty’s Approach to Retention Course  
Claude Hargrove and Ronnie Rollins; North Carolina A&T State University  
2.58

Building Continuous Loop Learning Communities: An Engineering Outreach Case Study  
Deborah Besser, Gerry Swan, Thomas Dziubla and Richard Eitel; University of Kentucky  
2.59

Advising Students with WebCT Vista: A Pilot Project  
Andy Ju An Wang; Southern Polytechnic State University  
2.60

T3-E: Engineering Technology 3  Moderator: Ted Branoff  
3:45 – 5:30, FEC 218

Distance Learning in Engineering Technology at Western Carolina University: Celebrating Success and Looking Toward the Future  
William L. McDaniel and Aaron K. Ball; Western Carolina University  
2.61

A Comparison of Exam Scores Between Fully Online and Lecture Supplement Sections  
John W. Lipscomb, Jr.; University of Southern Mississippi  
2.62
Integrating LabVIEW® into Engineering Technology Curricula ........................................2.63
Wes Stone, Aaron K. Ball, and Brian Howell; Western Carolina University

2007 Packaging Summer Programs at Christian Brothers University ..................................2.64
S. Malasri, A. Ray, Y. Zhou, J. Ventura, P. Shiue, A. Pourhashemi; Christian Brothers University/FedEx Express

Tuesday, April 8, 2008 Technical Sessions

<table>
<thead>
<tr>

<th>Moderator: Jacquelyn Mobley</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interdisciplinary Activities</td>
<td>8:45 - 10:00, FEC 308</td>
</tr>
</tbody>
</table>

A Course in Particle and Crystallization Technology ..................................................2.65
Priscilla J. Hill; Mississippi State University

Developing Elective Courses on Nuclear Energy .............................................................2.66
Shih-Liang (Sid) Wang and Gary Tatterson; North Carolina A&T State University

Multidisciplinary Teams for Engineering in Food Safety Applications – Bridges between Engineering and Biology .................................................................2.67
Jeffrey W. Fergus, Omar A. Oyarzabal, Robert S. Miller, William F. Gale and Donald E. Conner; Auburn University

NSF REU Site: Chemistry / Chemical Engineering: The Bonds Between Us - A Three Year Retrospective ..........................................................................................................................2.68
Adrienne R. Minerick; Mississippi State University

<table>
<thead>
<tr>
<th>T4-B: Mechanical Engineering 1</th>
<th>Moderator: Autar Kaw</th>
</tr>
</thead>
<tbody>
<tr>
<td>Materials and Design</td>
<td>8:45 - 10:00, FEC 215</td>
</tr>
</tbody>
</table>

Assessing Student Preparation for Senior Capstone Design Projects ................................2.69
M.H. Gordon; University of Arkansas

A Capstone Design Course in Fluid Thermal Systems .....................................................2.70
William S. Janna and John I. Hochstein; University of Memphis

Project Based Introductory Materials Science Course ......................................................2.71
Atin Sinha; Albany State University

Integrating Real World Situations into an Introductory Course in Engineering Materials ..............................................................................................................................2.72
Priya T. Goeser and Cameron W. Coates; Armstrong Atlantic State University

<table>
<thead>
<tr>
<th>T4-C: Professional Skills Division</th>
<th>Moderator: Hodge Jenkins</th>
</tr>
</thead>
<tbody>
<tr>
<td>Engineering Sourcing in the Global Economy: Interrelationship Between Math, Science and Pre-Engineering K-12 Education</td>
<td>8:45 - 10:00, FEC 219</td>
</tr>
</tbody>
</table>

Marcos Chu; International Council of Systems Engineering

Critical Thinking in Higher Education: A Strategy for Development .................................2.74
Keith Plemmons; The Citadel

*The Importance of Writing Skill to the Engineering Student* .................................................. 2.75
Leroy R. Cox and Katie A. Grantham Lough; University of Arkansas – Fort Smith / University of Missouri – Rolla

*Three Steps for Preventing Plagiarism* .................................................................................. 2.76
John Brocato; Mississippi State University

<table>
<thead>
<tr>
<th>T4-D: Administrative Division 5</th>
<th>Moderator: Claire McCullough</th>
<th>8:45 - 10:00, FEC 123</th>
</tr>
</thead>
</table>

*Sense and Sensibility: The Case for the Nationwide Inclusion of Engineering in the K-12 Curriculum* .................................................................................................................. 2.77
Robert E. Lindberg, Thomas E. Pinelli and James G. Batterson; National Institute of Aerospace/NASA Langley Research Center

*Capstone Design Based Engineering Design Outcome Assessment* ........................................ 2.78
Satinderpaul Singh Devgan; Tennessee State University

*Turning a Weakness into a Strength: Addressing ABET Requirements for Outcomes Assessment* .......................................................................................................................... 2.79
Tom Thomas, Mohammad Alam and John Steadman; University of South Alabama

*On Engineering Students’ Algorithm Insight and Math Manipulation Abilities: A Review* ................................................................................................................................. 2.80
G. J. Molina; Georgia Southern University

<table>
<thead>
<tr>
<th>T4-E: Software Engineering</th>
<th>Moderator: Evelyn Brown</th>
<th>8:45 - 10:00, FEC 218</th>
</tr>
</thead>
</table>

*Engineering Outreach to Law Enforcement* ............................................................................. 2.81
David A. Dampier; Mississippi State University

*The New Flavors of Engineering* ............................................................................................. 2.82
Barbara Victoria Bernal; Southern Polytechnic State University

*Student-Centered Online Courseware Development Using Adaptive Learning Environment* ................................................................................................................................. 2.83
Md Hasanuzzaman and Liang Hong; Tennessee State University

*Student Attitudes towards the Use of Graphical Programming Languages in an Introductory Engineering Course* ................................................................................................. 2.84
Jeremy Garrett and Thomas Walker; Virginia Tech

<table>
<thead>
<tr>
<th>T5-A: Civil and Electrical Engineering</th>
<th>Moderator: Michael Woo</th>
<th>10:15 - 12:00, FEC 308</th>
</tr>
</thead>
</table>

*Structuring Data for Analysis of Law Enforcement Surveillance Impact on Construction Zones* ................................................................................................................................. 2.85
Tulio Sulbaran and David Marchman; University of Southern Mississippi
An Effective Model for Course-level Continuous Improvement in an Electrical Engineering Technology Electronic Communications Course ...............................................................2.86
Shonda L. Bernadin and Youakim Al-Kalaani; Georgia Southern University

Proposed New Direction for Electrical Engineering Curricula: Inclusion of Instruction in Nanotechnology ...................................................................................................................2.87
M. R. Parker and A. Khan; University of South Alabama

Interactive Electrical Circuit Tutoring Tool – eTutor ........................................................2.88
Ghaith. Haddad, Gustavo Gamboa and Issa Batarseh; University of Central Florida

Agencies and the Data Provided to Assess Effectiveness of Rumble Stripes on Highway Safety ...............................................................................................................................................2.89
Tulio Sulbaran and David Marchman; University of Southern Mississippi

T5-B: Mechanical Engineering 2
Moderator: Matthew Gordon
10:15 - 12:00, FEC 215

Using Interactive Virtual Instruments to Teach Spectral Analysis .........................2.90
Y. Charles Lu, Adrian Ieta and William E. Murphy; University of Kentucky/Murray State University

Low Cost, Low Space, Low Set-up Time Experiments for a Course in Numerical Methods ..............................................................................................................................2.91
Autar Kaw, Brian Demenezes, Eric Allard; University of South Florida

Implementing a Hybrid Introductory Engineering Graphics Course .........................2.92
Theodore J. Branoff and Eric N. Wiebe; North Carolina State University

Connecting Industry Experience with Classroom Instruction ........................................2.93
Richard Kunz; Mercer University

T5-C: Civil Engineering 3
Moderator: Thomas Dion
10:15 - 12:00, FEC 219

Accreditation Changes in Civil Engineering Curricula: Addressing the Additional Science Requirement .................................................................2.95
Thomas R. Dion, Dennis J. Fallon and Kevin C. Bower; The Citadel

Improvisation, Ingenuity and Design of Experiments to Reinforce the Civil Engineering Curriculum ...................................................................................................................2.96
Michael J. Casey and Jesse B. Coleman; George Mason University

GIS Integration in a Civil Engineering Curriculum .................................................2.97
Stephanie Ivey, Paul Palazolo, Charles Camp; University of Memphis

Unexpected Consequences of Thoughtful and Innovative Engineering Education Curricular Reform: Identifying Competing Orientations and Sources of Pressure ...........................................2.98
Scott A. Yost and Derek R. Lane; University of Kentucky

Green Building Concepts in the Engineering Curriculum ........................................2.94
Daniel E. Meeroff, Frederick Bloetscher and Albert Muniz; Florida Atlantic University / Hazen and Sawyer, P.C.
### T5-D: Administrative Division 6

**Moderator:** Jessica Buck  
**10:15 - 12:00, FEC 123**

**Environmental Scanning for Strategic Planning at Higher Educational Institutions: A Literature Review for Engineering and Technology Faculty** ..............................................................2.99  
George Ford and Ron Miers; Western Carolina University

**Fort Valley State University Cooperative Developmental Energy Program: A Highly Successful Pre-collegiate and Collegiate STEM Workforce Program for Minorities and Women** ..2.100  
Isaac J. Crumbly, Jackie Hodges, Aditya Kar, and Singli Garcia; Fort Valley State University

**Dual Career Faculty Challenges** ..............................................................2.101  
Noel N. Schulz and Kirk H. Schulz; Mississippi State University

**Message Design Considerations for Use of Mobile Learning Content in Engineering Education** ..............................................................2.102  
Michael Dermody and Christine Russell; East Carolina University

### T5-E: Management Issues and Industrial Engineering

**Moderator:** Barbara Bernal  
**10:15 - 12:00, FEC 218**

**M.S. in Engineering Management with Packaging Concentration** .........................2.103  
S. Malasri, N. Jackson and J. Olabe; Christian Brothers University

**Utilization of an Engineering Management Body of Knowledge WIKI for Graduate Distance Education** ..............................................................2.104  
Greg Sedrick; University of Tennessee Space Institute

**An Approach to Determine the Industrial Engineering Body of Knowledge through Concept Mapping** ..............................................................2.105  
Denise Jackson, Mildred Louidor and Hal Aikens; University of Tennessee

**Navigating the Reality of Textbook Edition Management** .........................................2.106  
Scott R. Schultz and Laura W. Lackey; Mercer University

**An Automated Class Scheduler** ......................................................................2.107  
Ray Seyfarth and Cheryl Pierre; University of Southern Mississippi/Department of Defense
