There are 4 basic search options on the CD:

1. **Author Search**
   To search by author last name just click the “Authors” link on the left menu bar, then select the first letter of the authors last name. For example, if you select “A”, the result will be a list of all the authors that have a last name beginning with “A”. Below each name will be the title of the paper, the session the paper is location in, and the name of all the co-authors. If you click on the paper title it will open a pdf version of the paper. If you click on the session it will open a page that lists all the papers in that given session, with links to all the papers, and authors. If you click on a co-author name it will open a list of all papers by that author.

2. **Session Search**
   a) Under Conference Information, select Schedule at a Glance. Scroll to the bottom of the page. All the sessions are listed by topic area.
   b) To search a general topic area, click the “Sessions” link on the left menu bar. This will open a matrix with the title of each session. Above each matrix is a link to each day of the session. If you click on any day, it will open the matrix for that given day. If you click on any session title, it will display all the papers in a given session. If you click on the paper title it will open a pdf version of the paper. If you click on an author name it will open a list of all papers by that author.

3. **Individual full text search**
   To perform a full text search of a document, click on the search icon at the top of the Adobe Reader, see Figure 1.

   ![Figure 1Adobe search icon](Click here)

   In the search window insert the text you wish to search for.

4. **Full Proceedings text search – CD Version of the Proceedings Only**
   To perform a full text search of the entire proceeding first open Acrobat Reader in a separate window (Not in a web browser.) Click on the search icon at the top of the Adobe Reader, see Figure 1. Choose “Edit” – “Search” from the toolbar. Then select “Use Advanced Search option”, see Figure 2. This will open Figure 3. In the look in text box pull down the “Select Index option”, see Figure 3. This will open the select index window. Select the index “**papers.pdx**” located in the papers directory on the CD, and click OK. Now in the search window enter the text you wish to search on and Acrobat will search the entire proceedings. The results will be displayed in the window. Make sure the Acrobat window is full screen.

   Note, this search will only work off the CD, you can not do a full proceedings search from the web.
